

**The Fabrication
& Installation
Specialists**

CAPABILITY STATEMENT

**DEPENDABLE
END-TO-END
PIPING SOLUTIONS**

WHO WE ARE

Suncoast Piping is proudly a Western Australian-owned and operated company specialising in the fabrication and installation of piping systems for the mining, oil, and gas sectors.

Established in 2011 by its two Directors, Suncoast Piping has built a strong reputation as a reliable and technically capable contractor, delivering specialised piping solutions across a wide range of complex projects. The company quickly became a preferred provider for high quality fabrication and onsite installation services, known for its attention to detail, safety focus, and ability to deliver under demanding schedules.

Suncoast Piping has successfully completed major fabrication and installation works throughout Western Australia and interstate, both independently and through strategic joint ventures. This breadth of experience has strengthened the company's capability to manage diverse project scopes while maintaining consistent quality and performance.

With a commitment to excellence from project inception through to completion, Suncoast Piping continues to provide dependable, end-to-end piping solutions tailored to the needs of the mining and oil & gas industries.

Major Projects Completed

Roy Hill Port & Mine Site

Fabrication and installation of lube/hydraulic pipe.
